PROFESSIONAL SUMMARY

Data Engineer at Bizfy Solutions (intern since Mar 2026, full-time since Sep 2026) building production ELT pipelines and Medallion Delta Lakes on **Databricks, Microsoft Fabric and Azure** with **PySpark, SQL, Airflow and ADF**. Microsoft DP-700 certified; pursuing an integrated M.Tech in AI & Data Science (DAVV, 2027). Targeting **Data Engineer roles worldwide**, open to relocation.

EXPERIENCE

Data Engineer at Bizfy Solutions - *September 2026 to present*

- **Production Pipeline Scaling:** Architected and scaled end-to-end ELT pipelines processing **50M+ daily records**, moving workloads from batch polling to event-driven architecture so downstream consumers get fresh data without polling delays.
- **Medallion Lakehouse Optimization:** Led migration of legacy data storage to a Bronze/Silver/Gold Delta Lake on Databricks / Microsoft Fabric using ACID transactions, Z-ordering and MERGE upserts, **cutting query latency by 45%** for analytics and AI consumers.
- **Orchestration & Reliability:** Deployed workflows on Apache Airflow and Azure Data Factory with automated retries, anomaly detection and alerting, reaching **99.9% pipeline reliability** so downstream teams stop chasing failed loads.
- **AI-Ready Data Infrastructure:** Worked directly with AI/ML engineers to clean and vectorize structured and unstructured datasets, **speeding up LLM/AI model training cycles**.

Data Engineer Intern at Bizfy Solutions - *March 2026 to August 2026*

- Designed and maintained ingestion pipelines for AI applications, processing diverse structured and unstructured datasets.
- Built and optimized PySpark notebooks on Databricks for data preprocessing, feature engineering and cleaning.

EDUCATION

Integrated M.Tech - AI & Data Science | *School of Data Science and Forecasting, DAVV, Indore* **| Expected :** May 2027 | CGPA: 7.1/10
Relevant coursework: DBMS, Big Data Analytics, Data Warehousing, Statistical Methods, PySpark, Python

TECHNICAL SKILLS

- **Programming Languages:** Python (Pandas, PySpark) · SQL (T-SQL, PostgreSQL, MySQL) · Bash
- **Cloud & Platforms:** Microsoft Fabric · Databricks · Azure Data Factory · Synapse Analytics · Event Hubs · ADLS Gen2
- **Databases:** PostgreSQL · MySQL · Azure SQL Database · MongoDB
- **Data Modeling:** Star Schema · Slowly Changing Dimensions
- **Big Data & ETL:** PySpark · Apache Spark · Delta Lake · Apache Airflow
- **DevOps & Tools:** Git/GitHub · GitHub Actions · CI/CD · Docker · Linux

PROJECTS

Near Real-Time CDC Lakehouse Pipeline | *Azure SQL, ADF, Databricks, Delta Lake, ADLS Gen2, Synapse Analytics* **|** *Repo*

- Cut data latency from **24h to sub-10 min** with a metadata-driven CDC pipeline (SQL Change Tracking, ADF Tumbling Window Triggers) over **1M+ records**, giving downstream queries near-current data instead of day-old snapshots.
- Built **Medallion Architecture** with Delta Lake MERGE upserts, PySpark dedup, and idempotent fault-tolerant retry logic.
- Enabled **zero-compute Synapse Serverless** querying on Gold Delta tables by processing only incremental changes.

End-to-End Medallion ETL Pipeline (AQI Forecasting) | *Microsoft Fabric, PySpark, Delta Lake* **|** *Repo*

- Ingested AirNow API data into a **Bronze → Silver → Gold Medallion Architecture**, processing **10K+ AQI records** with config-driven PySpark and structured logging.
- Enforced Silver-layer quality via type casting, null handling and composite-key dedup, so the forecasting layer only reads clean, unique records.
- Delivered Gold Delta tables of aggregated AQI metrics feeding **Power BI AQI forecasting dashboards**.

Real-Time Weather Monitoring Pipeline | *Microsoft Fabric, Eventstreams, Eventhouse, Real-Time Dashboard* **|** Repo

- Built a real-time streaming pipeline ingesting live Delhi weather telemetry via Fabric Eventstreams into Eventhouse with **sub-second latency**, replacing batch polling.
- Configured dual Fabric Activators for high/low temperature threshold alerts, **replacing manual monitoring with automated alerting**.
- Developed a Real-Time Dashboard with live readings, trend lines and alert history, giving stakeholders **live visibility** into conditions.

CERTIFICATES

- Fabric Data Engineer Associate (DP-700) | Microsoft | Feb 2026 | Verify
- Astronomer Certification for Apache Airflow 3 Fundamentals | Astronomer | Feb 2026 | Credly

LEADERSHIP & ACTIVITY

Cloud Lead, GDG on Campus – SDSF Sep *2023 - Aug 2024*

- Drove **80+ Google Cloud learning path completions** by leading Cloud Study Jams; delivered Gen AI keynote to **50+ attendees** and elevated college chapter to **Tier 1 status -** ranked among top-performing institutions nationally.
